

Their table will be ready in five minutes.
Question is, will they?

Introducing NTN PlayCall—the only guest paging system that doubles as a game player.

Why give waiting customers a chance to change their minds, when you can give them an NTN PlayCall game pager instead?

For about the same cost as a conventional guest pager, it keeps your customers entertained while they wait with a choice of five fun, easy-to-play games. Meanwhile, your investment is protected by an auto-disable feature, which shuts down the game pager and sounds an alarm if it's taken out of range.

Bringing together our industry-leading interactive entertainment and wireless communications, NTN PlayCall game pagers are unlike anything you or your guests have seen before, yet are fully compatible with existing systems. NTN PlayCall game pagers—the perfect appetizer for wait-conscious customers.

Visit us at Booth 918 for demonstrations of all our latest products!

NTN PlayCall Game Pagers
